

Drawing Amendments

Proposed Drawing Correction by Applicant

A correction to figure 20 is proposed as shown by the attached red-line markup. The crosshatching shown in two sections in each of the multiframes is an error in that the crosshatching in each frame of these sections was inadvertently reversed. This correction is supported by Figure 1 as shown on page 3 of the parent provisional application. Both a red-line markup and a formal replacement sheet of drawings are enclosed. Approval of this proposed correction and acceptance of the corresponding formal drawing is sought.

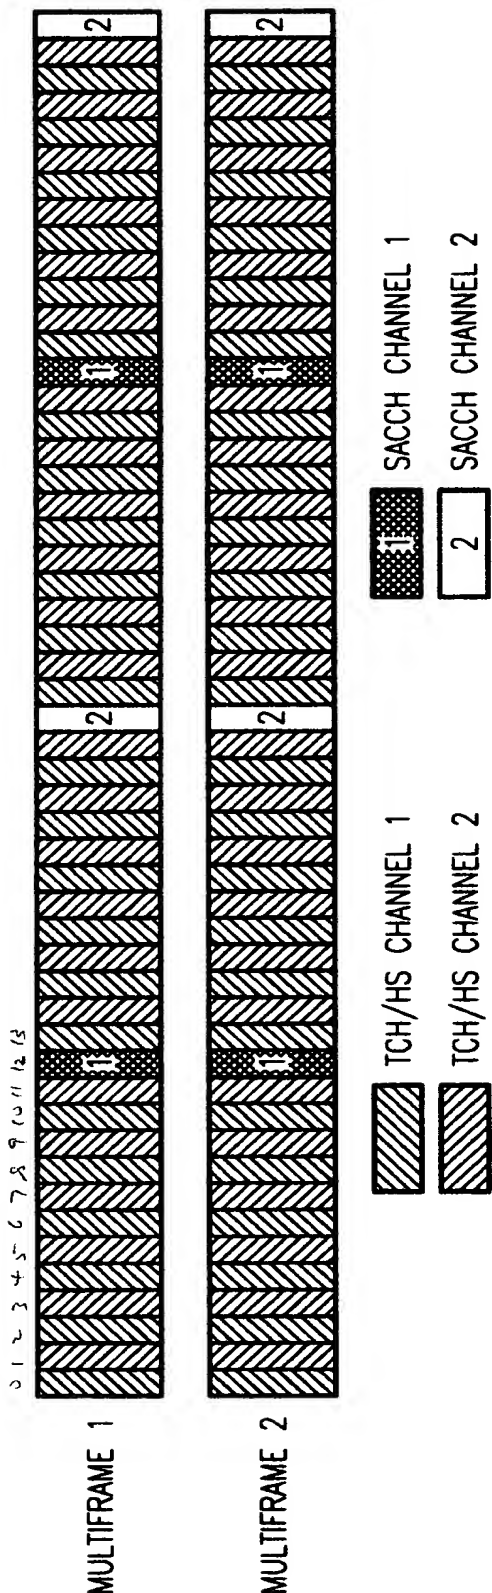

FIG. 20
(PRIOR ART)

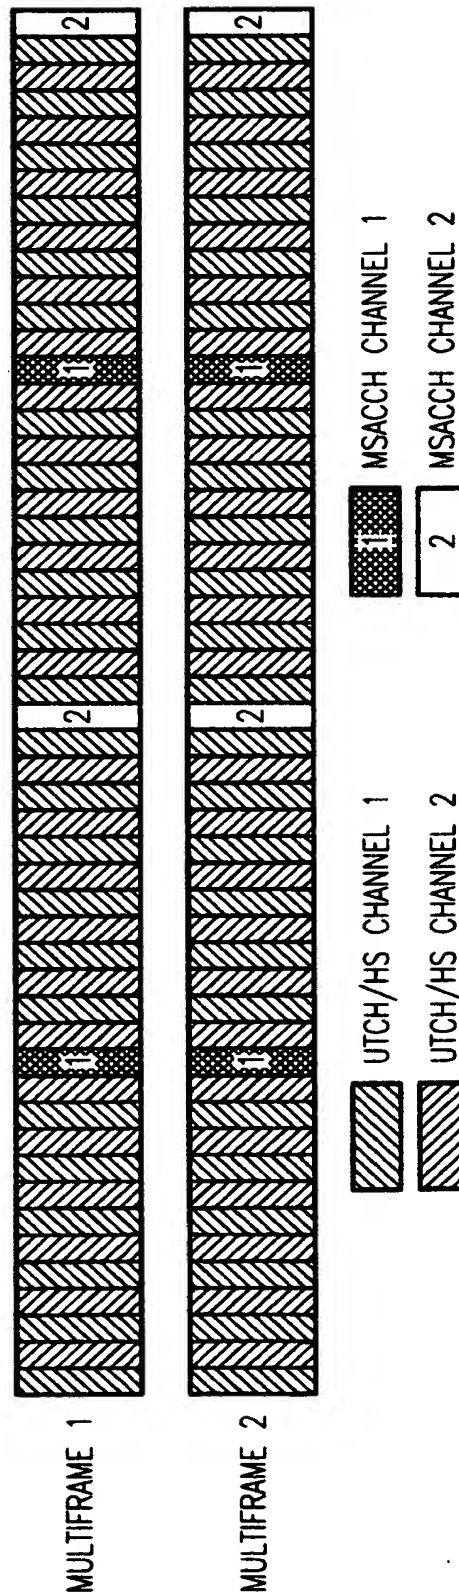

FIG. 21
